

Fever Detection & Thermal Scanning Solution

Why Choose CERTIFY?

The CERTIFY SnapXT accurately measures an individual's temperature in less than one second. Our predefined workflows can be customized to alert personnel of individuals who engage the CERTIFY solution with a temperature that exceeds the threshold set by you.

For Organizations Large and Small

CERTIFY has been working with top brands across the globe since 2012 to provide a best-in-class solution that helps solve labor-related challenges that plague many industries.

Achieve a Better Way to Work

- Anonymous Scanning
- Semi-Anonymous Scanning
- Identified Scanning
- COVID Questionnaires
- Policy Enforcement
- QR Code Utilization
- Access Control
- Facial Recognition

Customized for Your Company's Needs

Protect your organization by enabling a customized health screening that all members are required to fill out before the SnapXT grants them access through the doors.

Security

CERTIFY's security approach focuses on safe governance, risk management, and compliance. This includes encryption at rest and in transit, network security and server hardening, administrative access control, system monitoring, alerting, and more. CERTIFY is HiTrust, ISO 27001, and HIPAA compliant.

Manage and Track Data Easily

View all important information regarding your scanning devices on one digital platform. Keep track of unlimited devices, store temperatures, and manage members, all with 24/7 support if needed.

Contact Tracing

In the COVID-19 era, everyone deserves to feel safe in their workspace. The All Access option of CERTIFY.me Cloud offers contact tracing included for 100 members per month.

Satisfied Customers

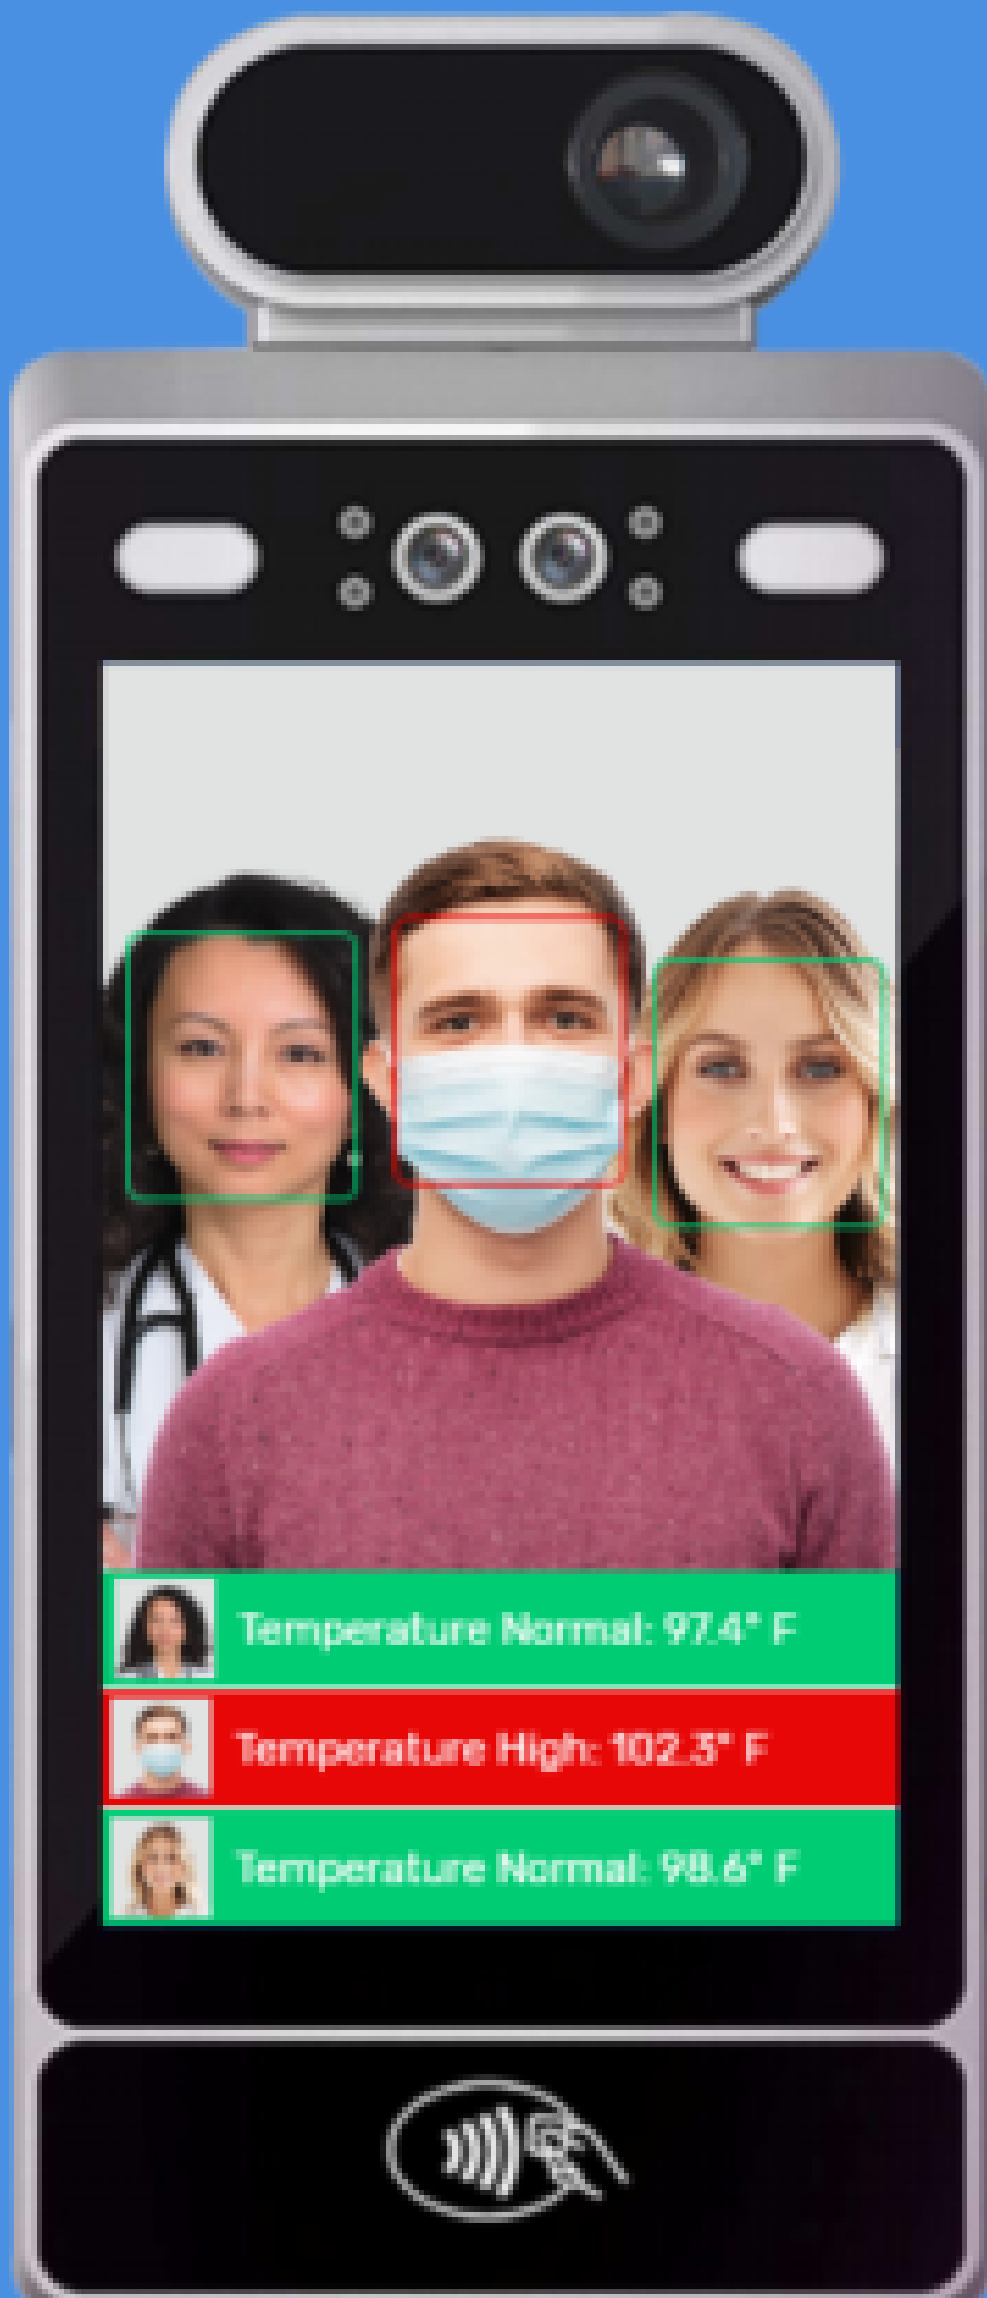

"We truly feel this new technology will ensure that they are able to stay, play, and work safely at our resort – destination."
Joe Lupo | President of the Hard Rock Hotel & Casino Atlantic City
